

SPOT ADVENTURES

Every Day is an Adventure. Share Yours.

Share tracks, photos, stories and updates of your adventures with friends, family & other SPOT users. With SPOT Adventures, you can share your adventures easily at **spotadventures.com**. Register your SPOT device and enjoy the benefits of a new online community. We provide a full social portal that allows you to share GPS location data from your SPOT device in near real-time via a SPOT Live Map.

Save your adventures easily on a detailed map of your trip accompanied by photos and a personal blog. You will have your own personal profile and social portal to keep track of all your amazing SPOT experiences.

1

Log into Your Account

You can do it from inside your SPOT Account or right on www.spotadventures.com. Pick a User Name that your friends can identify with (i.e Katie's_Adventures or Bob_Mary_Boating). Your user name and password do not need to match your SPOT account user name and password. When signing up for your SPOT Adventure account you can link your SPOT device at sign up.

2

Create Your Profile

Give your on-line SPOT Adventure account a little background on you. If you have another website or blog – put the link in your profile.

3

Share Your Adventures

Build a robust SPOT Adventures experience by also showing your GPS location data on your Live Map. To do this, you need to create at least one Shared Page. SPOT Adventures will automatically incorporate this into your profile. To set up a Shared Page, go to the Share tab in your SPOT Account. From here you can follow the simple instructions to set up a Shared Page.
